CSI Study: Post Scan - manage data

CSI:
- Makes scan data available to PI via several options:
  - Cut DVD
  - PI's directory on server

PET scan raw data must be run through algorithms to create visual image

Does PI need help with data?*
- Yes
  - Requires documented agreement as part of protocol meeting
  - FUTURE STATE – cluster:
    - Assists with pre-processing, analysis
- No

End

PI:
- Future state:
  - PI's directory on cluster

Other researchers:
- Coord: invoices,
